HSAD16/110VAC S

- Two-port surge arresters type T3 for serial connection.
- Intended for protection of one-phase electronic appliances against the effects of switching, induced and residual overvoltage generated in LV power supply systems.
- Contains an improved thermal fuse, which ensures timely disconnection of HSAD* S from the power grid during the MOV's overheating and thus prevents damage to the HSAD* S.

- Installed at the boundaries of LPZ 2 – LPZ 3, as close to the device to be protected as possible (no further than 5 m).
- In front of HSAD* S must be installed a lightning current and surge arrester T1 and T2 from HAKEL company.
- **S** indication specifies a version with remote monitoring.
